02 FOUNDATIONS · TYPE

VT323 + JETBRAINS MONO

DISPLAY · VT323

SUPERTOAD

For hero readouts, stardates, massive numerics, and callsigns. Emulates a low-res CRT readout. Keep to 1-2 moments per screen.

MONO · JETBRAINS

$ traceroute iss-supertoad.local

Primary workhorse for all UI copy, data tables, command-line echo, button labels, and chrome. Default weight 400; use 500 sparingly for emphasis.

04 PRINCIPLES

HOW WE DRESS THE SHIP

001 · PHOSPHOR, NOT PHOTOSHOP

Everything is transmitted, not rendered. Scanlines, a soft bloom on light text, and a near-imperceptible flicker should always be present. No drop shadows. No glassmorphism. No gradients except the phosphor glow itself.

002 · MONOSPACE AS GRID

Type is the grid. Align by columns of 8. Prefer ASCII box-drawing and dashed dividers to boxes and borders. Corners are square. Radii are for enemies.

003 · DATA IS DRAMA

Latencies, coordinates, packet loss and star dates are the ornament. If a slot looks empty, add a readout, not a decoration. Every number should feel real — use live values where you can.

// END OF TRANSMISSION
